Sure, no problem. The files are on my tower in the office, I can finish the file up tomorrow morning.

**Subject:** Additional info for WV

Jessie: Do you think we can send them the info on where the highest EtO concentrations are coming from by process? Renu said Laura Crowder will be meeting with Union Carbide on Friday. WV will determine this afternoon if they would want the source to run a full AERMOD analysis and/or do an inspection to check leaks. If we can get the info to them before Friday, they can use it at their meeting. Oh, they plan to show them your analysis on Friday.
